HARDWARE

AURA Storage System

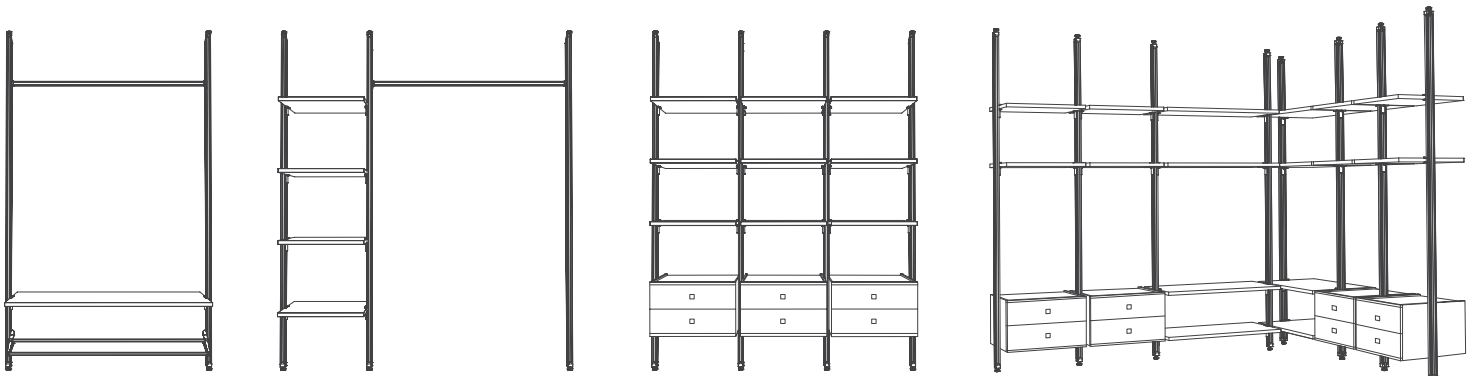

Aura was specially created for wardrobes but can equally be used at home as a display system.

Simple to build with endless combinations to fit even the most awkward spaces, these components are designed to get the maximum functionality out of any space.

The accessories all hang off a simple floor to ceiling telescopic stanchion that can fit into any opening between 2.1m to 2.7m high. These are extremely simple and very quick to install creating a tailor made solution designed for any space.
